

DAVID IYA

ENGINEERING & PRODUCT LEADER | FOUNDER

davidiya.com | davidiya3@gmail.com | linkedin.com/in/davidiya | github.com/iyography

Founder and technical leader connecting product direction, engineering and team building. Led a 20+ engineer organization at Eze, a marketplace with \$70M+ in company-wide GMV. Built AI creative systems and a video product. Seeking engineering or product leadership with a strong team.

EXPERIENCE

Claude Code Club | 2026 - Present

Co-Founder, Product & Growth

- Co-founded a community that reached 8,000+ members and \$40K MRR in under three months.
- Designed automated curriculum production using a proprietary knowledge base, AI-assisted research and distribution across seven channels.

Buildroom.ai | Dec 2024 - 2026

Co-Founder & CTO, now Advisor

- Grew platform revenue from \$7K to \$40K MRR through automation adoption; transitioned to advisor.
- **Robinhood client work:** built an AI creative dashboard, custom Figma integration and disclosure-insertion workflow, supporting a reported 10x increase in ad creative output with human review.
- **Showplace:** solo-built and launched a listing-to-narrated-video product using ElevenLabs and Veo 3; grew it from \$0 to a \$10K MRR milestone.

Eze | Nov 2017 - Jul 2025

Co-Founder & CTO, then Advisor | Y Combinator W20

- Owned marketplace architecture and technical direction, including live bidding, pricing systems and 10+ integrations across Next.js, NestJS and MongoDB.
- Built and led a 60+ person organization across engineering, operations and business development, including 20+ engineers.
- Company outcomes: \$70M+ GMV, \$6M+ revenue, 12,000+ business customers across 30+ countries and \$3.7M in venture funding. Moved to an advisory role in July 2025.

EverCheck | Senior Software Engineer | Dec 2017 - Jul 2018

- Led enterprise healthcare compliance platform development, concurrent with founding Eze.

T-21 Technologies | Full-Stack Software Engineer | Oct 2015 - Feb 2017

- Built OTT streaming web platforms and device interfaces using JavaScript, HTML5, CSS and C#; led release documentation and change management.

Releaf | Frontend Web Developer | 2015 - 2018

- Built the company's first MVP platform.

RECOGNITION & EDUCATION

Y Combinator alumnus: W20 (Eze founder), S17 (Releaf first-MVP developer). **Forbes 30 Under 30:** Enterprise Technology, 2023. **On Deck Founder Fellowship:** 2021.

University of North Florida | Associate of Arts, General Studies, 2016.

TECHNICAL & PRODUCT RANGE

Leadership: technical direction, team building, roadmap prioritization, product strategy, customer discovery. **Engineering:** React, Next.js, JavaScript, NestJS, SQL, MongoDB, Supabase, API integrations. **AI & creative systems:** Claude Code, n8n, custom Figma integrations, ElevenLabs, video workflows, UI/UX design.
